Notes:

- Each order form is valid for continuous collection of public fill at a particular time slot. A project can submit a number of public fill order forms to collect public fill at different time to suit the construction programme.
- > The collectors shall provide their own trucks for the collection of public fill at PFRFs.
- Each truck with a valid dumping license shall carry a copy of public fill order form (which shall be authenticated by original office chop) for the collection of public fill at the designated PFRF.
- > Truck drivers shall follow instructions of the PFRF site staff to collect public fill at specified locations.
- > PFRF site staff issues transaction records to the truck drivers providing relevant data on the public fill collection.
- ➤ Project Offices/Authorized Person/Recyclers shall check the transaction records and monitor the reuse of public fill in their projects to avoid illegal dumping/use.
