

**FIGURES**

## LIST OF FIGURES

| Figure No. |  | Page No. |
|------------|--|----------|
| 1.         | Sequence of Drained Reclamation  | 65       |
| 2.         | Reclamation in Shallow Water and Deep Water  | 65       |
| 3.         | Soils Suitable for Vibrocompaction   | 66       |
| 4.         | Relationship between Correlation Factor $\mu$ for Field Vane Shear Strength and Plasticity Index | 66       |
| 5.         | Method of Calculation of Stability of an Embankment on Clay                                      | 67       |
| 6.         | Foundation Soil of Limited Depth and Uniform Strength  | 67       |
| 7.         | Definition of Compressibility Parameters   | 68       |
| 8.         | Shortening of Drainage Path by Vertical Drains   | 68       |
| 9.         | Tidal Effect on Pore Water Pressure Measurement  | 69       |
| 10.        | Settlement Monitoring Instrument Cluster   | 70       |
| 11.        | $u - \sigma$ Plot  | 71       |
| 12.        | $s - \delta_H$ Plot  | 71       |
| 13.        | Typical Relationship between Height of Fill (h), Time (t) and Lateral Deformation ( $\delta_H$ ) | 72       |
