1. **SCOPE**

- 1.1 This Technical Guidance Note (TGN) provides a list of technical guidance documents currently used by the Geotechnical Engineering Office (GEO) as de facto geotechnical standards in Hong Kong.
- 1.2 Any feedback on this TGN should be referred to Chief Geotechnical Engineer/ Standards & Testing of the GEO.

2. **TECHNICAL POLICY**

- 2.1 The technical guidance documents listed in Annex TGN 1A1 of this TGN are used by GEO as de facto geotechnical standards. These include Geotechnical Manuals, Geoguides, Geospecs, selected GEO Publications, selected GEO Reports, selected GEO Circulars, GEO TGNs and some publications issued by others, e.g. Hong Kong Institution of Engineers. From time to time, Development Bureau Technical Circulars (Works) (TCWs), and Buildings Department Practice Notes for Authorised Persons, Registered Structural Engineers and Registered Geotechnical Engineers (PNAPs) are also used to promulgate new/revised technical guidance. It is intended that TGNs will progressively be prepared to cover the technical guidance in geotechnical engineering given in TCWs, PNAPs and GEO Circulars, which will then be revised to give administrative procedures only.

3. **ANNEX**

- 3.1 TGN 1A1 - List of Technical Guidance Documents.
