

- LEGEND:
- Colluvium
 - Decomposed volcanic rock (grade IV to VI)
 - Volcanic rock (grade I to III)
 - Decomposed granite rock (grade IV to VI)
 - Granite rock (grade I to III)
 - Fill on slopes, only down slope face shown. (fill slope reference number included where applicable)
 - Reclaimed land (overlying marine clay and Hong Kong Granite)
 - Alluvium, overlying Hong Kong Granite
 - Colluvium - undifferentiated (overlies Coarse tuff)
 - Dominantly pyroclastic Repulse Bay Formation
 - Coarse tuff
 - Fault with letter designation, dip direction and direction of movement
 - Photolineament
 - Geological boundary, certain
 - Geological boundary, uncertain
 - Geological boundary, inferred from aerial photograph interpretation
 - Natural failure and date it occurred
 - Original shoreline as shown on 1845 plan
 - Hummocky ground surface
 - Seepage
 - Strike and dip of joint set
 - Vertical joint, strike
 - Strike and dip of bedding or stratification
 - Drillhole location and number
 - Drillhole with piezometer
 - Test pit, with colluvium classification
 - Caisson location
 - Chunam strip location
 - Exposure logged in detail
 - Exposure with colluvium classification
 - Colluvium, class 1
 - Colluvium, class 2
 - Colluvium, class 3
 - Line of geological section

NOTES:

1. All data obtained from Mid-levels site investigation are marked with an asterisk
