

Wide variety of opportunities

With about 240 geo-professionals, GEO is world-renowned for the expertise and achievements in slope safety and geotechnical engineering.

Slope upgrading & landscape treatment

Rock cavern & underground space development

Natural terrain landslide risk management

Project management

Development of standards & guidelines

Control of deep excavations

Innovation & Technology

Control of tunnelling works

Landslide emergency services

Control of site formation works

Public engagement

Public education on slope safety

Ground investigation

Explosives control & quarry management

Training Scheme of Geotechnical Engineering Graduates 2025

We offer . . .

Well-structured + Diversified Training Programme

Day-to-day supervision by Training Tutors

Guidance by Engineering Supervisors

Mentoring by caring Coaches (1-to-1 basis)

12-month site experience

5-month focused training in geology, ground investigation & laboratory testing

12-month design experience

7-month exposure to greater responsibility, including project management

Rewarding Career

Head

Thomas Hui
1994 Intake GEG

"We care and treasure our GEGs as the valuable asset of GEO. That's why we deploy many resources in this training scheme, assisting our GEGs to build up their professional engineering competence and nurture their personal growth."

Rachel Law
2001 Intake GEG

"If you aspire yourself to face challenges as a leader, you will treasure the all-rounded GEG training scheme. Many ex-GEGs contribute in various posts in the government and have proved themselves competent in different job nature."

Deputy Head

Jonathan Lau
2003 Intake GEG

"GEO is one of the world-leading organisations in the technical development in geotechnical engineering. We are now striving to bring innovation and technology into our industry. I am proud of being a part of the team."

Chief GE

Dominic Fung
2018 Intake GEG

"The GEG programme has shaped me into a professional GE. Having the training opportunities to participate in reclamation and tunnelling projects has enabled me to undertake multi-disciplinary duties supporting infrastructural development in Hong Kong."

Senior GE

Gloria Ip
2020 Intake GEG

"The past three years as a GEG have been rewarding and stimulating. I was privileged to learn in different working environment. The training scheme also allowed an almost seamless transition to Assistant GE."

GE

Angela Chow
2022 Intake GEG

"I gained essential geotechnical knowledge related to geology, ground investigation and laboratory testing during the initial stage of training, and was able to apply and strengthen them during my attachment in a mega-scale engineering project."

Assistant GE

GEG

* GE - Geotechnical Engineer GEG - Geotechnical Engineering Graduate
