

**Construction Standard CS2:2012**  
**Steel Reinforcing Bars for the Reinforcement of Concrete**

**The following amendments are made to CS2:2012:**

1. Clause 3.1.5(g), change to

“the result of surface geometry measurement or beam test, alternatively a statement in the mill test certificates to confirm that the results of surface geometry measurement or beam test are in compliance with this Standard is acceptable;”

2. Clause 5.1.4, add a new paragraph at the end

“For the requirements on chemical composition (product analysis), the retest carried out by an alternative HOKLAS accredited laboratory is also acceptable.”

**The Standing Committee on Concrete Technology**  
**Development Bureau**  
**The Government of the Hong Kong Special Administrative Region**  
**4 July 2014**
