

Construction Standard CS2:2012
Steel Reinforcing Bars for the Reinforcement of Concrete

The following amendments are made to CS2:2012:

1. Table 4, 3rd column, 3rd row for carbon content of Grade 500B & 500C, replace
“0.22” with “0.22^a”.

2. Table 10, the table header for both Class 1 and Class 2, replace
“Tensile” with “Tensile properties”; and
“Rebend” with “Bend performance”

3. Clause 6.1, replace the last sentence with
“The length of the test specimen for the tensile test shall be at least 1 metre long.”
