APPENDIX TO FORM OF TENDER – P. 2

NOTES TO THE SCHEDULE OF CONTRACT PERCENTAGES

(a) The tenderer shall complete the Schedule of Contract Percentages strictly in accordance with the following notes.

(b) The tenderer shall complete Section Percentages in column (3) in whole numbers. Section Percentages should lie within the maximum and minimum limits specified. Each Section Percentage shall not be less than a minimum of \(-20\) nor greater than a maximum of \(+70\). If a tenderer has inserted Section Percentages outside the limits stipulated, inserted percentages lower than the minimum limit will be corrected to the minimum limit \(-20\) while inserted percentages higher than the maximum limit will be corrected to the maximum limit \(+70\). If a tenderer has failed to insert any Section Percentage, the Section Percentage will be corrected to zero. Each value (except the value zero) entered shall be preceded with \(\pm\) sign to represent positive value or \(\mp\) sign to represent negative value. If neither \(\pm\) nor \(\mp\) is added to a non-zero number, the value shall be corrected as a positive number.

(c) The tenderer shall insert an Adjustment Percentage in whole number in column (4) and delete the word “PLUS” or “MINUS” whichever is inapplicable. The tenderer shall not precede the entered number with \(\pm\) sign or \(\mp\) sign. If such \(\pm\)or \(\mp\) sign is added, it will be disregarded. If a tenderer has failed to insert the Adjustment Percentage or has failed to delete either of the words “PLUS” or “MINUS” marked against the Adjustment Percentage or has deleted both the words “PLUS” and “MINUS” marked against the Adjustment Percentage, the Adjustment Percentage will be ascertained by back calculation using the equation stipulated in Note (d). If the Adjustment Percentage cannot be so determined with certainty, it shall be corrected to zero.

(d) The tenderer shall calculate the Contract Percentages and insert the values in column (5) using the following formula and rounding to the nearest whole number, e.g. \(+10.49\) shall be rounded down to \(+10\); \(+10.50\) shall be rounded up to \(+11\).

\[
\text{Contract Percentage} = \frac{(100 + \text{The corresponding Section Percentage}) \times (100 + \text{Adjustment Percentage})}{100} - 100
\]

(e) The tenderer shall complete the values in column (7) which shall be equal to the values in column (5) multiplied by the corresponding values in column (6).

(f) The Total of Values for Tender Assessment is to be the summation of the values in column (7).

(g) If a tenderer has inserted any Section Percentage, Adjustment Percentage or Contract Percentage not in whole number, the relevant Section Percentage, Adjustment Percentage or Contract Percentage shall be corrected by rounding to the nearest whole number, e.g. \(+10.49\) shall be rounded down to \(+10\); \(+10.50\) shall be rounded up to \(+11\). If any mistakes are found in the Contract Percentages, Values for Tender Assessment or the Total of the Values for Tender Assessment, correction will be made to these Contract Percentages, Values for Tender Assessment or the Total of the Values for Tender Assessment as the case may be to bring them strictly in accordance with the above notes. If a tenderer has amended the Section Percentage, Adjustment Percentage or Contract Percentage which are fixed values, the amendment(s) will be
(h) The Section Percentage and Adjustment Percentage applicable to the Schedule of Rates of Section 28 on Site Safety and Item 27020 are fixed at 0% and hence the Contract Percentage for Section 28 is also fixed at 0%. Tenderers shall not amend the Section Percentage, Adjustment Percentage and Contract Percentage for Section 28 and Item 27020.

(i) The weighting factors given are to be used for tender assessment purpose only, and they do not indicate the extent of the work. The Employer does not give any representation, warranty or guarantee that the weighting factors or any part thereof bears any relation to the actual proportion of any item of work to the Whole of the Works.

(j) Contract Rate of an item of work = Rate of the item of work in the Schedule of Rates \( \times \frac{(100 + \text{the relevant Contract Percentage})}{100} \)

(k) All values in columns (3), (4), (6) and (7) are for tender assessment purpose only.
